(54) Title: SYSTEM AND METHOD FOR DISPLAYING AN IMAGE STREAM

(57) Abstract: A system and method may display an image stream, where an original image stream may be divided into two or more subset images streams, each subset image stream being displayed simultaneously or substantially simultaneously. The spatial position of the images displayed substantially simultaneously in each time slot may be variably adjusted based on a predetermined criterion. The images may be collected from an ingestible capsule traversing the GI tract.
